

This belt chart lists the appropriate belt sizes for the different combinations of water pump and crank pulleys available from KRC. All belt sizes incorporate, except the water pump only drive kits, a 4.2" power steering pump pulley. See Page 46 for Serpentine, V-Belt, Gilmer and HTD belts. KRC pulley systems that incorporate a 6.0" steering pump pulley must add 1.5"-2.0" to the belt lengths listed below. If you are running a 6.0" pulley please call KRC and we can help you determine the correct belt length.

If there is an "X", that option is part of your system.

Standard Pulleys: Include 3.5" Water Pump Pulley (KRC 40122000/KRC 38050000) and R-LOK Crank Pulley (2.5", 3.0" or 3.5")

Pro Series Pulleys: Include 4.0" Water Pump Pulley (KRC 38025400/KRC 38050400) and R-LOK Crank Pulley (3.0", 3.5" or 4.0")

Chevrolet 350 - Standard Pulleys - Head Mount

Pulley Size	With Bolt-On Tank	With Idler-Tensioner	Belt Size	Part Number
3.5" W/P 2.5" Crank	-	-	36.0"	GDY 4060360
